

Nabid Sheikh

Environmental Engineering Student, CZU Prague

nabidsheikh06@gmail.com · linkedin.com/in/nabidsheikh-431164184 · nabidsheikh.systems

Environmental engineering student focused on remote sensing, hydrology, and GIS — using satellite data to study how mountain environments are changing. Also builds and runs the cloud infrastructure behind his own research site.

EDUCATION

Czech University of Life Sciences Prague (CZU) — Faculty of Environmental Sciences

B.Sc. Environmental Engineering, 2nd year · expected 2027

Coursework: environmental chemistry, hydrology, GIS, air pollution, ecotoxicology, soil science, landscape ecology.

BACHELOR THESIS — IN PROGRESS, DUE MARCH 2027

Long-term trends in snow cover duration in Czech mountain ranges and their implications for water resources

Supervised by doc. Ing. Jan Komárek, Ph.D.

- Tracks snow cover duration across three Czech mountain ranges (Krkonosé, Šumava, Hrubý Jeseník) using 24 years of MODIS satellite data (2000–2024), split into three elevation bands.
- Key finding: snow cover duration is declining below 1,200 m across all three ranges (significant in 11 of 18 elevation–forest categories tested); no significant trend above 1,200 m yet; temperature tracks the decline more closely than precipitation at every elevation tested.
- Tools: Google Earth Engine, Python (pandas, pyMannKendall), ArcGIS Pro.

FIELD EXPERIENCE

Snow Hydrology Field Course — Krkonosé Mountains, Czechia

January 2026

Snow pit stratigraphy, snow water equivalent measurement, avalanche risk assessment and safety certification.

Polar Winter School — Agricultural University of Iceland, Borgarnes

March 2025

Snow microstructure, impurity deposition in snow, UAV-based snow cover mapping, arctic snow hydrology.

TECHNICAL SKILLS

Remote sensing	Google Earth Engine, MODIS (MOD10A1/MOD10A2), Sentinel-2, UAV data collection
GIS	ArcGIS Pro, QGIS, DEM-based elevation analysis
Programming	Python (pandas, matplotlib), R, JavaScript (Earth Engine scripting)
Statistics	Mann-Kendall trend test, Sen's slope estimator, correlation analysis
Field methods	Snow pit excavation, SWE measurement, avalanche safety certified
Infrastructure	Linux administration, cloud VMs (Oracle Cloud, Azure), CI/CD (GitHub Actions), SSH/Tailscale networking, nginx, Let's Encrypt/TLS

LANGUAGES

Bangla (native) · English (fluent) · Czech (developing)

OPEN TO

Research assistant roles, field campaigns, thesis-related collaboration, and infrastructure or DevOps work.
